  - Redux Toolkit
  - Typescript
  - React testing library and JEST
  - ExpressJS
  - Version Control Systems: Git, Github
  - Webpack
  - Parcel
  - Vite
  - Babel
- 

## Experience

---

### Front End Developer

Frontrol, Inc

04/2023 to Current

Remote, India

- I had the exciting opportunity to work at a startup focused on product development.
- My primary role involved building a Project Portfolio Management software : PACE.
- As a developer, I specialized in using React and TypeScript, which allowed me to work on the front-end of the application.
- I took quality seriously by writing thorough test cases using Jest and Testing Library, ensuring that the software was reliable and functional.
- To make data fetching efficient, I utilized RTK Query, making the application faster and more user-friendly.
- I also played a crucial role in optimizing the application's performance. I used techniques like useMemo, useCallback, and RTK Query to achieve faster loading times and improved responsiveness.
- Working in a product development startup was a dynamic experience. I had to adapt quickly to changing project requirements and tight deadlines.

### Front End Developer

Tata Consultancy Services

10/2020 to 03/2023

Remote, India

- Developed email templates using HTML, CSS, and JavaScript on the Marketo platform.
  - Optimized React app using lazy loading/code splitting techniques.
  - Customized CSS frameworks like Bootstrap, Tailwind, and SASS.
  - Developed application-level code to interact with APIs and Restful API using JSON.
  - Debugged existing bugs on the website using developer tools.
  - Developed config driven UI that adapts as per business and region of hosting.
  - Experienced in Custom Hooks, Redux Toolkit.
- 

## Education and Training

---

### Bachelor of Engineering: Computer Science

Acropolis Institute of Technology And Research

04/2020

Indore
